## Synopsis

Vijay is a postgraduate student who wants his savings to grow by investing in the stock market. He has learned about the critical phenomenon of diversification during his corporate finance class. However, he did not execute it while he invested because he was not aware of it. Investing in the stock market is an excellent way to grow one's wealth and achieve one's goals. However, it has to be allocated properly to achieve the financial goals while managing risk. He was excited and started applying the knowledge he had gleaned from the corporate finance course to make his investment better.
